4. Github Repository

“Challenges Faced”

At first I faced the problems in commit the file It shows the error in commit so I resolved it. In branching the file contents are saved in another branch so I delete all contents in that branch and then create and saved the file in another branch.

“Learning Outcomes”

I learned about how to create a repository.

I learned how to create a branch and how to switch to another branch.

I learned how to commit, push and pull.

Understood the staggging and initialize concept.

I learned how to create a website in github and how to create a README.md.
